Ideal LANTEK 7G 1GHz Certifier

Dear Mr. Huedepohl,

BKS Kabel-Service AG executed field measurements with LANTEK 7G. With those tests it has been clearly shown, that LANTEK 7G can be used for field measurements up to 1 GHz.

Our team can confirm the measurement accuracy compared to a network analyzer. The measurement speed and the high measurement accuracy are impressing.

With LANTEK 7G we are able to evaluate our Multimediasystem MMC3000pro up to the frequency limit of 1 GHz in the field.

LANTEK 7G is with this letter approved for certification of installations through certified installers of BKS. This approval covers the whole guarantee program of BKS for the Multimediasystem MMC3000pro and all Class F and Class E installations equipped with BKS components.

We are looking forward to a good cooperation and will recommend installers to use LANTEK 7G for acceptance tests of the Multimediasystem MMC3000pro for certification of the Multimediasystem MMC3000pro.

Yours Sincerely,

BKS Kabel-Service AG

Walter Affeltranger
Head of Research & Development

Jürg Bässler
Head of Sales & Marketing
