Mr. Ed Pivonka  
Ideal Industries, Inc.  
9650 Chesapeake Drive  
San Diego, CA 92123

September 12, 2006

Dear Ed,

HellermannTyton is pleased to announce the approval of the LANTEK 6/6a/7/7G field test units for use in the qualification of our GigaBand Category 6 and MegaBand Category 5e System installations.

Customers can use the IDEAL factory supplied patch cords or HellermannTyton's GigaBand Category 6 patch cords for both Category 6 and Category 5e field testing.

HellermannTyton's approval is based on extensive laboratory and field evaluation of the LANTEK 6/6a/7/7G test units against the current TIA/EIA-568-B.1 and TIA/EIA-568-B.2-1 standards. The results are repeatable, provide a very high degree of accuracy and correlate with our laboratory data using a Hewlett Packard Network Analyzer.

Sincerely,

Jennifer Moczynski  
Product Marketing Manager – Network Cabling Solutions
